

# Project Proposal

deadline: 2024/11/11 23:59

1. **Source of Topics:** You can choose topics based on class content or assignments, topics related to computer vision (CV) that you are personally interested in researching, or topics from top conferences or journals that catch your interest.
2. **Main Objective:** The focus is not on achieving completely novel results, but rather on demonstrating your understanding, exploration, and analysis of the chosen topic.
3. **Organization and Content of the Report:**

You should write a one page (preferably one page, can be more, not mandatory) proposal containing the following sections:

- **Problem Definition:** Describe the chosen topic.
- **Motivation:** Explain why you find it interesting.
- **Related Work:** List and give a short description on related work in this area to show your understanding of existing research.
